

TRELLIDOR POLYCARBONATE BAR

Trellidor Polycarbonate Bar is an attractive, transparent burglar proofing for windows. It is ideal for estate living, hospitality establishments and homes or offices that don't require highly visible burglar proofing. It is manufactured from transparent polycarbonate panels that can be adjusted to block out intruders as well as baboons and monkeys. Our neat design and strengthening features provide protection as well as an appealing, see-through installation.

All Trellidor security barriers are manufactured at our LPCB ISO audited factory. The manufacturing process includes pre-treatment for enhanced corrosion and UV resistance before undergoing powder coating. This helps to retain the quality finish and increases the lifespan of the barrier, making them suitable for both coastal and inland conditions.

FEATURES AND BENEFITS

- Made from lightweight yet strong, transparent polycarbonate panels
- Patented extruded aluminium frame provides neat finish and improved strength
- Installed using unique tamper-proof fixing system
- Installed by fixing into surrounding substrate for improved strength
- Adjustable panes allows customised gap sizes
- Window handles and hinges easily accommodated
- Effective in keeping out monkeys and baboons
- UV resistant
- Ideal for estates with strict rules about burglar proofing
- Custom made to fit by Trellidor and professionally installed

WARRANTY

With the correct maintenance, our products will help keep both corrosion and criminals at bay. Ask your Trellidor Security Consultant about our recommended maintenance regime to ensure the validity of the full warranty.

Trellidor and The Ultimate Crime Barrier are registered trademarks of Trellidor (Pty) Limited. As a conscientious consumer please remember that given enough time and the right tools, all security barriers can be breached no matter how well they're constructed. As a responsible manufacturer, however, we endeavour to design, engineer, test and install all our products to give our customers the best possible security barriers the technology at the time allows.
